CAREER OBJECTIVE

Hardworking and highly motivated Information Science Engineering student with a strong academic background (CGPA 8.73), eager to apply and enhance technical knowledge through hands-on project development. Able to work effectively both independently and as part of a team, with a strong willingness to learn, adapt to new technologies, and contribute positively to academic and project-based objectives.

EDUCATION

5th Sem – B.E, Information Science and Engineering
Channabasaveshwara Institute of Technology, Gubbi, Tumkur
CGPA: 8.73
Aggregate: 87.3%
2023 – Present

PUBICATION

A Machine Learning-Based Centralized Placement Hub for Enhancing Campus Recruitment Efficiency

Presented at the International Conference on Artificial Intelligence, Smart Materials and Applications (IC-AI SMART 2025), organized by Jagadguru Sri Shivarathreeshwara Academy of Technological Education, Bengaluru, AICTE Sponsered and Scopus Indexed Conference [12 December 2025].

SKILLS

- **Technical skills**
 - Programming Languages : c, python, Java(Baics).
 - IDE:Visual studio code, Jupyter notebook.
 - Tools: power Bi, Tableau
 - **Soft skills**
 - communication, project management, presentation skills.
-

PROJECTS

Weather Based Outfit Suggestion

Developed a system that recommends suitable clothing based on real-time weather conditions by analyzing parameters such as temperature, humidity, and rainfall. The application helps users make quick and comfortable outfit decisions by converting weather data into practical clothing suggestions.

A Centralized Placement Hub

Developed a web-based platform to organize placement preparation by centralizing learning resources and providing performance insights through dashboards and analytical evaluation, **helping students track progress and improve placement readiness.**

LUMI – My Virtual Assistant

It is a web-based voice assistant that enables users to interact using speech commands. It performs basic tasks through speech recognition and voice responses. The system is developed using HTML, CSS, JavaScript, and the Web Speech API. The project demonstrates simple AI-based interaction in web applications.

CERTIFICATIONS

- Java Android App Development – Channabasaveshwara Institute of Technology (CIT)
 - Participated in a workshop on *Application Development with AI and Essential Skills* conducted by NASSCOM
 - Business Startup Development Program
 - Presented a machine learning–based centralized placement system at IC-AI SMART 2025 (AICTE-sponsored, Scopus-indexed).
 - Completed the Build Your Global Innovation Portfolio program by Futred Innovation Studios.
-

HOBBIES

Dancing, Paper craft, Reading books.
